

Hands-On Training Course on Surgical Anatomy of the Neck, Larynx and Parotid Gland

7-9 February 2024

Bellaterra (Barcelona)

Goal:

This practical course wants to review the surgical anatomy of the neck, the larynx and the parotid gland through individual dissection work on cadaver. It is the result of a close collaboration between the Otorhinolaryngology-H&N Department of the Hospital de Sant Pau and the Human Anatomy Department at UAB. We want to stress that every participant will do a complete anatomical dissection on a cadaver with the objective of acquiring a better knowledge of the surgical anatomy and this practical work will be done following a strict guideline with clear objectives.

Faculty:

J. García, ORL-HNS. Hospital del Mar, Barcelona.
A. Holgado, ORL-HNS. Hospital Santa Creu i Sant Pau.
X. León, ORL-HNS. Hospital Santa Creu i Sant Pau.
R.M. Mirapeix, Human Anatomy Department. UAB.
M. Quer, ORL-HNS. Hospital Santa Creu i Sant Pau.
J.R. Sañudo, Department of Human Anatomy and Embryology. Universidad Complutense de Madrid.
C. Valero, ORL-HNS. Hospital Santa Creu i Sant Pau.

Direction and Coordination:

R.M. Mirapeix, Human Anatomy Department. UAB.
M. Quer, ORL-HNS. Hospital Santa Creu i Sant Pau.

Course Daily Schedule:

Wednesday, February 7

09:00-13:30 Morning sessions:

- Introduction.
 - Superficial layer of the neck: skin, platysma.
 - Superficial fascia and submandibular area (level I).
- 14:30-18:30 Afternoon sessions:
- Special lecture: Selective neck dissections.
 - Surgical anatomy of the levels II, III and IV.

Thursday, February 8

09:00-13:30 Morning sessions:

- Surgical anatomy of the level V.
 - Anterior neck: Strap muscles.
 - Superior Thyroid gland and laryngeal nerves.
- 14:30-18:30 Afternoon sessions:
- Special lecture: Framework laryngeal surgery.
 - Surgical anatomy of the larynx.

Friday, February 9

09:00-13:30 Morning sessions:

- Superficial anatomy of the parotid area
 - Facial nerve in the parotid gland. Lateral parotidectomy.
- 14:30-18:30 Afternoon sessions:
- Special lecture: Controversies in parotid surgery.
 - Total parotidectomy.
 - External carotid artery.
 - Final remarks

Fees:

1.500 €

Includes:

- One side of the specimen for each participant
- Basic instrumental
- Surgical loupes, courtesy of Optimedic
- Dissection manual
- Coffee breaks and lunches
- Course dinner (Thursday)

Official language of the course:

English

Course venue:

Dissection room in the Human Anatomy Department. Faculty of Medicine. Universitat Autònoma de Barcelona (UAB). Bellaterra
